Patient: ALBRIGHT, DENISE R. · DOB 04/09/1963 · MRN RGH-0091874 · Admitted 10/21/2026 · Attending: Elena Vasquez, MD

Physical Medicine & Rehabilitation consultation — 10/26/2026 — Robert Lindqvist, MD (PM&R)

Reason for consult: rehabilitation needs after acute left middle cerebral artery ischemic stroke (admitted 10/21/2026).

Findings: right hemiparesis (right arm strength 2/5, right leg 3/5); expressive aphasia; oropharyngeal dysphagia on a modified diet per speech-language pathology. Before admission she was fully independent and working full time.

Medical needs: medically stable for transfer. Requires daily physician oversight for blood pressure management (labetalol being titrated) and for dysphagia with aspiration risk.

Assessment and plan: excellent candidate for acute inpatient rehabilitation. Needs physical therapy, occupational therapy and speech-language pathology. Therapy tolerance is improving daily; expected to participate in 3 hours of therapy per day within 2–3 days. Husband at bedside daily; discharge goal is home with husband. Recommend admission to an acute inpatient rehabilitation facility.

Therapy minutes (from PT, OT and SLP daily notes)

Date	PT	OT	SLP	Total	Note
10/24/2026	30 min	30 min	30 min	90 minutes	fatigued after sessions
10/25/2026	30 min	30 min	30 min	90 minutes	participating fully
10/26/2026	45 min	45 min	40 min	130 minutes	tolerated well
10/27/2026	60 min	60 min	45 min	165 minutes (2 hours 45 minutes)	with rest breaks; no adverse events

Function on 10/27/2026 (therapy notes)

Transfers bed to chair: moderate assistance of one. Walking: 25 feet with a hemi-walker and moderate assistance. Toileting: maximal assistance. Swallowing: modified diet, supervision with all meals.
